

## Temperature & humidity monitoring Automate for peace of mind

Take advantage of mobile-first, real-time temperature and humidity sensors to quickly & easily monitor, alert, take action, and mitigate risk

Trusted by over 75,000 customers across the world

# Mitigate risk with automated temperature monitoring

Any loss of sales days can have a dramatic impact on a business. Monitor your high value assets around the clock, alert the people who need to know and resolve issues immediately - all from your mobile.

## How does this help our customers

### Mitigate risk, reduce stock loss and damage

Real time fridge or freezer temperature monitoring on your mobile, provides 24/7 visibility allowing customers to take action immediately to resolve issues before they get serious.

### Keep businesses running, reduce lost trading days

Mitigating risk and avoiding critical issues means that businesses can stay open and avoid lost trading days and downtime.

### Improve employee health & safety

Monitoring ambient temperature in work environment can also improve employee health & safety, with alerts to conduct exercise in extreme weather environments.

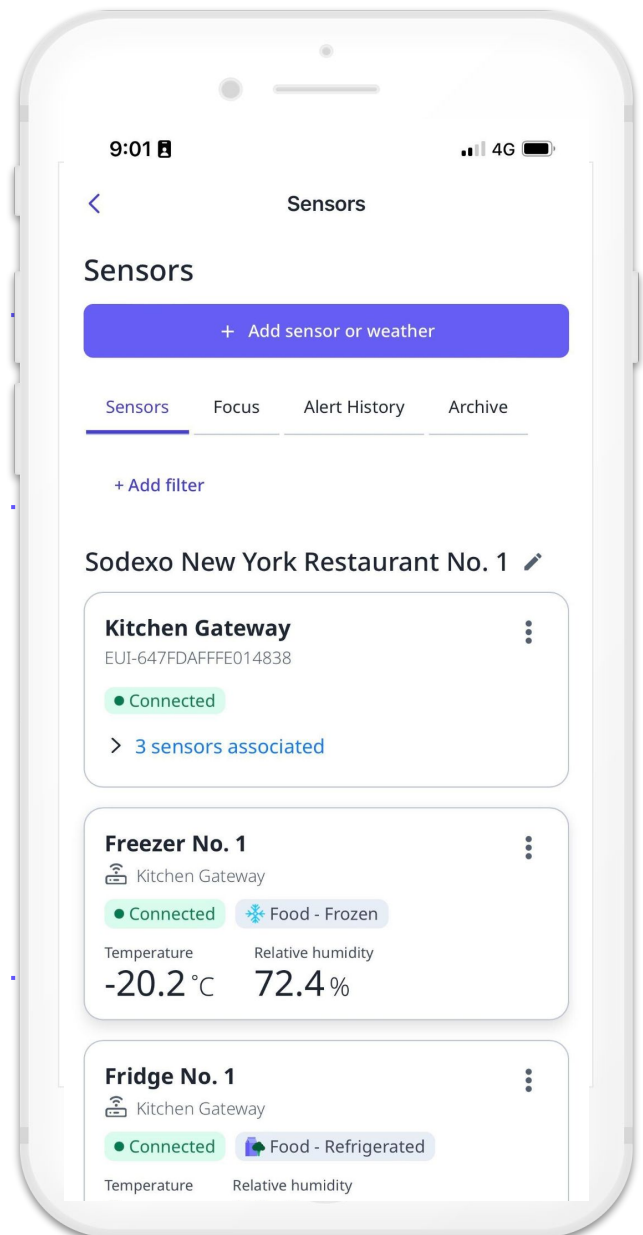

## How will this help brokers support their customers

### Preventing claims from happening

Avoiding claims will mean that insurance premiums will stay lower for longer for customers, resulting in a financial benefit.

### Faster claims experience

In the event of a claim, the data will be immediately available, meaning that claims will be able to be paid out more quickly.

## A solution relevant across multiple industries

Retail,  
Hospitality &  
Entertainment

Hospitals,  
Aged Care,  
Pharmacies,  
Veterinary

Agriculture &  
Food  
Manufacturing

Aviation

# Monitor, alert, resolve & report

## How it works

### Buy and deploy devices through SafetyCulture

#### Find the right devices for your environmental needs

An out of the box solution that is easy to set up and gets you connected in minutes.

### Define critical temperature and humidity ranges

#### Capture what matters for your business

Set-up your temperature thresholds with configurable measurement intervals, and trigger instant alerts to employees on shift when things aren't right.

### Identify issues automatically and assign tasks

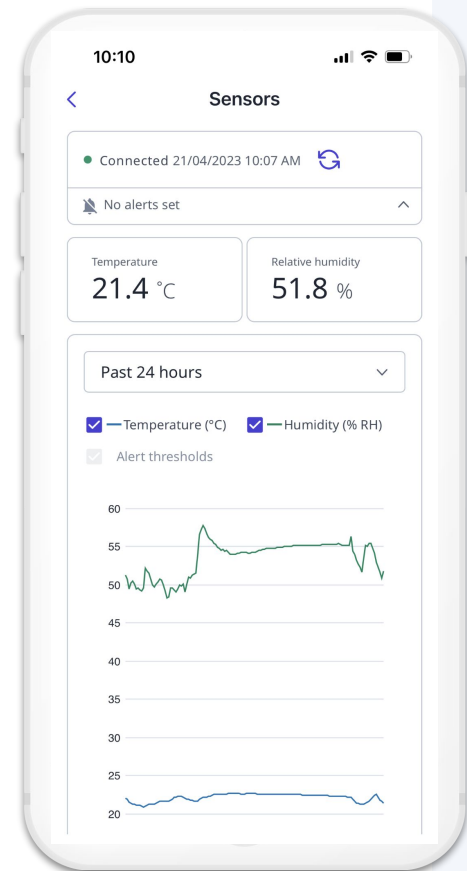

#### Take immediate action

Set up notifications that trigger when the sensor detects changes out of the normal range, with escalation alerts sent via email, push notification or SMS. Address rapidly by assigning actions to the right person.

### Track and report everything

#### Prove your performance

Keep all your data & readings secure in one place, and discover the simple way to manage compliance digitally, with reports available on demand.

## Benefits & ROI

### Improved operational efficiency

- Reduce stock loss & wastage
- Reduce paper usage
- Get time savings & improve output with mobile solution
- Reduce insurance claims and keep premiums low

*"I received an SMS alert late one Saturday night saying that the temperature in our cold storage was rising. If we had only found out about it when we arrived on Monday, we would have had to throw out everything in the cold room. That one little message saved us tens of thousands of dollars."*

**MARLEY SPOON** | Sofia Dias, Food Safety and Quality Manager

*"The reliability is definitely a factor. Plus, there is no I.T. support required for this... it really helps take the weight off the shoulders of all our teams. It's also great for auditing purposes when we get inspected by official governing bodies."*

**SpaMedica** | Austin Hankinson, Fleet and Facilities Assistant

# Pricing

## Sensors

### Fridge Sensor

Price: **\$72**

**Operating temperature:**

**Standard:** -40C to +80C / -40F to +176F

**Probed:** -55C to +125C / -67F to +257F

**Accuracy:** Temp  $\pm 0.2^{\circ}\text{C}$  & Humidity  $\pm 10\%$

**Battery:** Replaceable battery ~3-5 years use

**IP Rating:** IP65

**Use Case:** Suitable for standard fridge applications

**Range:** ~100m/300ft (may vary depending on environmental conditions)

**\$84 per device**  
**annual connection cost**

## Gateways

### 4G Cellular Gateway

Price: **\$539**

**Key Differences:** Wireless connectivity + built in 4-hour backup battery

### Ethernet Gateway

Price: **\$237**

**Key Differences:** Setup of this gateway may require IT support. If internet connection goes down readings will be affected

**No ongoing connectivity cost**

Note: For business who are setting up a SafetyCulture account for the first time, they will need to purchase at least one full seat for the SafetyCulture platform.

Note: All hardware comes with a 12 month warranty from date of purchase
